

How to use the materials

Each chapter of *Feature Films in English Language Teaching* is accompanied by a set of teaching material. The authors have created appealing and creative tasks which can immediately be implemented in the classroom. Please note that due to copyright regulations, not all materials include original screenshots from the films.

Orange boxes are used as a standard box for additional information or introductions to the tasks that follow.

The red magnifying glass marks specific learner support, for example language scaffolding.

The play button is reserved for tasks that require watching parts of the film or short videoclips.

Similar to the play button, the camera indicates a task based on pictures or illustrations.

The computer icon indicates that the task requires Internet research or online sources.

The notepad is used for writing tasks, such as „Fill-the-gap“ activities or creative writing exercises.

This icon indicates partnerwork for two students.

When this icon is used, the task is created as group work.
